

The Monroe Fire Department

&

S.W.N.I.F.R.A.

Invites you to the 78th Annual

Monroe Fire School

Thursday the 7th

Friday the 8th

Saturday the 9th

Of Aug 2014

at

State Line Ice & Community Expo Center

“SLICE”

1632 4th Avenue West in Monroe, WI

2014 Classes

20-Hr Hands on Class Thursday/Friday

T/F **1-Nozzle Forward (NEW)**

Thursday Morning class 8-12

T-1 "Fire ground Leadership & Responsibility" – (NEW)

Thursday afternoon class 1 - 5

T-3 - FIRST-IN: Fire ground Leadership, Tactics and Strategies (NEW)

Friday 4-Hr Classroom Classes Morning 8 am -12

F-10 Engine Company Operations: Mastering the Fire Floor (NEW)

F-14 Juggling Hats: (NEW)

Friday 4-Hr Classroom Classes afternoon 1 pm - 5

F- 15 Leadership Principles for the Fire Officer: (NEW FORMAT)

F- 17 Tactical Emergency Casualty Care/TEMS Overview (NEW)

8-Hr Hands on Classes for Friday

F-1 Basic/Intermediate SCBA & MAYDAY Training

F-5 Basic Fire & Arson Investigation

F-6 Operations for the 1st arriving Truck Company

8 Hr Extrication Class for Friday

F-3 Auto X – Advanced Tactics

Friday 8 hr "Live Fire Classes"

F 20- Surviving Initial Attack

F 21-Flashover Simulator 1pm to 5 pm

Fri/Sat 16 hr RIT Class by RICO Rescue

F/S 2 Fire ground Rapid Intervention (RIT)

Saturday 8hr "Live Fire Classes"

S-20 Surviving Initial Attack

S-23 **Coordinated Fire Attack @ Flashover Simulator (NEW)**

8-Hr Hands on Classes for Saturday

S-1 Basic/Intermediate SCBA & MAYDAY Training

S-5 Basic Fire & Arson Investigation

S- 6 Engine Pump Ops (NEW)

S-7 Rural Water Operations Class

S-8 Female Firefighting Operations

8 Hr Extrication Classes for Saturday

S-4 Heavy Rescue Extrication

S-11 Vehicle Extrication-Crash Bash

4-Hr Sat Classes, Aug 9th, 8am – 12 & 1pm – 5

105- Trauma Review

205 - Helicopter Landing Zone Safety, Appropriate Helicopter Utilization, Helpful Tips for the 911 Dispatcher when Calling for the EMS Helicopter

106 – STEMI recognition with a 12 LEAD

206- Hot Topics in Paramedicine

If a Department sends 5 Students the 6th Student is free. To get the 6th student for free, all 6 registrations need to be sent in at the same time

Class Descriptions & Numbers

20-Hr Class Thursday/Friday** 8 am – 6 pm both days**

T/F 1-Nozzle Forward (NEW)

Lead Instructor: Aaron Fields, Seattle Washington FD Eng 28

The one thing that every fire department in the country has is fire hose. The one event that happens on every single fire is hose-line gets pulled and water gets flowed. The Nozzle Forward is a class for engine company crews. It is not a collection of techniques; it is an adaptable system of hose line management and fire attack. It is focused around fighting fire, interior offensive firefighting and aggressive firefighting, for which we will never apologize. Aggressive firefighting is not the problem, it is the solution.

For today's nozzle-person, the art of hose and fire suppression often has been obscured and put to the side in favor of other "hot topic" training. How to attack fire and move the line has been ignored and forgotten by many engine companies. "The fire goes as the first line goes" so, Go Dog Go!

It is the ongoing development of an in-depth study of all things engine. It is not a "what if" class, it is a program designed to engrain the nozzle team to make the right choice and be able to accomplish whatever task is necessary for a successful interior attack. This is not theory; it is proven on fire-grounds around the country. Adapted from a variety of sources, but reconstructed to be based around simple principles that maximize mechanical advantage.

The class answers the "whys," not just the "what's," and quickly creates a system that can be adapted to fit any engine company from urban to rural.

The goal of the "The Nozzle Forward" is to help craft more efficient Engine Companies by increasing the individuals' competency with their tools and expanding on the conceptual aspects of the fire environment.

The course will integrate the three major components of engine company work; fire behavior, hose management, and fire attack.

The class is 20 hours over two days, all but 2 ½ -3 are hands on.

Now let's go do good work...

Thursday 4 hour Class Room 8 -12

T -1 “Fire ground Leadership & Responsibility” – (NEW)

Lead Instructor: Mike Mason, Ret Lt Downers Grove FD

Course Description: If you’re currently an officer or an acting officer or just preparing to take that step through the promotional process, this incredible seminar will make you THINK HARD about the roles and responsibilities in FIRE and RESCUE operations, and to your department. This program provides effective leadership and followership skills needed to direct companies into “battle”. The program looks into decision making, problem solving, discipline, planning, communications, and safety & training. Lt. Mike Mason (RET.) will present to attendees through video, audio and “WAKE UP” lecture; an in-depth review of interesting topics from aggressive leaders within the military and fire service arenas.

Find out how to get the firefighters and officers in your department to engage into a mindset of prevailing on the fire ground.

Thursday 4 hour Class Room 1 - 5

T-3 - FIRST-IN: Fire ground Leadership, Tactics and Strategies (NEW)

Lead Instructor: Mike Mason, Ret Lt Downers Grove FD

Course Description: First-in fire companies arriving at structure fires are under a whirlwind of fast paced dynamic decision making. This unique and compelling program covers the fire ground dynamics and its relationship to the decision making processes of incorporating the risk of interior firefighting. The program also covers a wide range of topics such as rules of engagement, battleground leadership, principles, studies for high risk- low frequency events, size-ups related to old and modern building construction, imminent dangers at structural fires, tactics and strategies while also providing true experiences and case studies. A presentation suited for all ranks of the fire service.

Friday 4 hour Class Room Classes morning 8 am - 12

F-10 Engine Company Operations: Mastering the Fire Floor (NEW)

Lead Instructor: **Aaron J. Heller is a 30 year veteran of the fire service and a captain in charge of training for the Hamilton Twp. NJ Fire District #9.** Capt. Heller is a NJ Level 2 instructor, fire official, and EMT. Heller is an instructor with the Mercer County Fire Academy. Capt. Heller instructs at several national, regional, and local training events including FDIC, FDIC EAST, Firehouse Central, and dozens of FOOLS sponsored events. He is a founding member of the Jersey F.O.O.L.S chapter of the Fraternal Order Of Leatherhead Society, and he is the owner of On Scene Training Associates, LLC

Course Description: This half day seminar will provide attendees with an in-depth discussion of multiple types of Engine Company operations. Topics include riding assignments, responsibilities, personnel positioning, Engine Co. equipment, and common mistakes made by Engine Companies. This course will begin with the basic residential fires and move onto more complex multiple occupancy fires, as well as fires in commercial buildings such as Big Box Stores, warehouses, and strip malls.

F-14 Juggling Hats: (NEW) Morning Class

Lead Instructor: Chief Craig Haigh, Hanover Park FD, Field Staff Instructor, IFSI

Course Description: The job of managing a volunteer or combination department is not easy. Customer expectations and call volumes continue to increase while leaders are faced with more and more unfunded mandates, flat or declining revenues, greater training and certification demands, staff availability, recruitment and retention concerns, vision casting and organizational succession planning. Chiefs and command officers tackle all of these issues while trying to juggle a “real job” and family demands. This presentation will address the multiple management demands in an attempt to better equip the volunteer chief or command officer with tools to help address some of these concerns.

Friday 4 hour Class Room Classes afternoon 1 pm - 5

F- 15 Leadership Principles for the Fire Officer: (NEW FORMAT) Afternoon Class

Lead Instructor: Chief Craig Haigh, Hanover Park FD, Field Staff Instructor, IFSI

Course Description: This course will identify leadership philosophies and facilitate a patch of discovery designed to help the student identify their own leadership qualities, strengths and weaknesses. Students will discuss the traits of both good and bad leaders and how to enhance their own personal leadership skills. Students will also learn how to conduct value assessments to identify how to successfully lead their organizations.

Chief Haigh will provide numerous examples, case studies and insights drawn from his 29 years of experience leading volunteer, combination and career fire departments.

Target Audience:

Fire Officers from volunteer, combination and small career departments.

F- 17 Tactical Emergency Casualty Care/TEMS Overview (NEW)

Lead Instructor: Chris Cook, Paramedic, RN, SWAT Medic –Walworth Co (WI) SWAT
Chad Stiles, Police Officer/Paramedic – Milwaukee (WI) Police Dept

Course Description: Life threatening gunshot wounds can cause death in less than three minutes – less than the time it takes for a victim to be tactically evacuated from a police “hot zone” into EMS care. In this introduction into Tactical EMS, the students will learn how tactical EMS differs from standard EMS, how patients are treated and extracted “under fire”, and what equipment and tactics are used in TEMS.

The lecture will describe the history of Tactical EMS and the state of TEMS today. The basic principles of Tactical Combat Casualty Care and its NEW civilian counterpart Tactical Emergency Care will be presented along with real-life photos and videos of combat and SWAT settings. Students will be introduced that these same principles can be used in situations that may occur in day-to-day EMS as well. Lastly, we will touch on tips for initiating TECC protocols in the student’s home area.

The breakout stations will be:

Hemorrhage control – the most common cause of preventable deaths in gunshot/stabbing victims. Students will be shown how to apply combat tourniquets to stop arterial bleeding. Techniques for applying the tourniquet to assist

others, as well as applying the tourniquet to oneself will be demonstrated. The use of homeostatic agents, wound packing and combat pressure dressings will be demonstrated for injuries not amenable to tourniquet application.

Penetrating torso injuries/Airway compromise – Immediate care will be demonstrated for a variety of EMS levels. (i.e. Tension Pneumo/Chest Seals and Needle decompression demo)

Tactical Pt. Assessment – Students will be shown an assessment method for the tactical environment utilizing the M.A.R.C.H. acronym

High threat extractions – Students will see how a patient can be extracted from the tactical hot zone while maintaining cover and reducing threat exposure to the patient and rescuers utilizing basic ropes, drags and friction reducing devices

At each station, the student will be introduced to the appropriate order of treatment in a high threat environment, appropriate gear and medical equipment for hot and cold zone treatment, and preparation prior to an event.

Friday 8 hour Hands On Classes

F-1 Basic to Intermediate SCBA & MAYDAY Training

Lead Instructor: Jeff Van Patten & Jim Cook/Antioch IL FD

Course Description: This class is designed as a confidence builder for those individuals who have limited experience using Self Contained Breathing Apparatus. This class takes a hands-on approach with students working in mazes with blacked-out masks. The mission of this course is to return you to your department with a full understanding of their SCBA, its components, uses, limitations, emergency procedures, and the ability to survive in a hostile environment using your mind, body, and SCBA. Cadets/Explores are welcome in this class, **Safety Rules Apply & SCBA**

F-5 Basic Fire & Arson Investigation, with hands-on

Lead Instructor: Andrew M Skic, Mount Prospect FD

Course Description: With departments downsizing &/or pooling their resources, task of fire & arson investigation is one resource not to be overlooked and could be standardized easily. Whether you have been in the fire service for 6 months or 20 years, consistent and recognized procedures are crucial to a thorough and complete investigation. Some legal aspects, hands-on evidence collection, effects of suppression, etc. will be covered. The student will leave with the ability to help establish standard policies & procedures for fire investigations. This course can also benefit those who desire to transition into the field of fire & arson investigations. Students will be investigating a scene, so you'll need to have your gear. **Safety Rules Apply**

F-6 Operations for the 1st arriving Truck Company

Lead Instructor: Paul Yakowenko - Randall FD, Mark Henningfield - Town of Burlington FD, Nate Longo - Waterford FD, John Mogan Chicago FD, Mike Bloom Round Lake FD

Course Description: This class is hands on and simulated scenarios will be performed under live conditions. Students will be tasked with conventional forcible entry, search, rescue and ventilation. This class will help to reinforce the necessity of performing these skills on the fire ground in a safe and timely manner, while enabling them to learn the tactical priorities and enhance tactical decision making. This class is designed for the candidate firefighter to the fire chief. **Safety Rules Apply & SCBA**

Friday 8 am to 5 pm Auto Extrication Class

F-3 Auto X – Advanced Tactics

Lead Instructor: Lt. Mike Huffman, Harlem-Roscoe FD, TERC Judge

Course Description: This class will consist of Advanced Vehicle Rescue techniques while using an assortment of hand tools and hydraulics. Emphasis will be placed on tools such as hi-lift jacks, struts, reciprocating saws, air chisels, etc. This course will cover advanced tactics that are not used on a routine basis, but when needed are invaluable. These tactics include floor pushes, dash displacement alternatives, inverted patient removals, stacked vehicles, under – rides, side impacts vehicles on roofs, tunneling, ram work, etc., all completed in a variety of scenarios. This course also incorporates standard extrication best practices including scene safety, scene size up, complex stabilization, and glass management. **Safety Rules Apply**

Friday 8am to 5pm “Live Fire Classes”

F-20 Surviving Initial Attack

Lead Instructor: AC Dave Fornell, Casstown FD Ohio, & Ret. Chief of Chicago FD, Andy O’Donnell

Course Description: You can see the glow in the sky. The engine stops in front of the building. There are decisions to be made: Attack-Rescue-Offensive-Defensive. This class will help give you the knowledge to make the right decisions, guide you toward successful outcomes, and keep you and your crew from being seriously injured or worse in the process.

Instructors with a combination over 150 years of on-line experience will walk you through the decision making process and then on the fire ground, help hone your skills when making the attack. This is an advanced, intensive course, not for the light of heart. You must have the determination and acquire the skills presented to succeed.

The intensive classroom session will present you with the basics. The all-day burn session, staffed with seasoned professionals, will hone your skills in fire ground safety, team building, and send you home with a proven and balanced approach to successfully size up, attack and take control of adverse situations

– **Safety Rules Apply; Live Fire**

F-21 Flashover Simulator Class, this class will be from 1pm to 5pm Friday afternoon

Course Description: **“Flashover is one of the most-feared phenomena among firefighters. Firefighters will be taught to recognize rollovers and flashovers in that one day might make a difference.”**

Friday/Saturday 16 hour RIT Class by RICO Rescue

F/S 2 Fire Ground Rapid Intervention (RIT)

Lead Instructor: Cliff Gartner Ret. Lt. CFD Squad 5 & RICO Fire Rescue

Course Description: The need for the eyes & ears of individual firefighters as well as Rapid Intervention Companies in rescuing one of their own is now & should be a priority for every fire ground situation. The numerous risks faced by today's fire service dictate that well trained and skilled firefighters be available to respond and perform the unthinkable in rescuing one of their own. This 2-day, hand's on, interactive program provides some of the most intensive disciplines in firefighter rescue and survival. Participants enrolled in this program will receive and be able to take back with them, the solid basics as well as the most advanced up to date techniques and maneuvers in rapid intervention for the dynamic fire ground. No firefighter engaged in firefighting should be without this life saving program taught by some of the country's most experienced national instructors in this fields of discipline. **Safety Rules Apply & SCBA**

Saturday 8am to 5pm “Live Fire Classes”

S-20 Surviving Initial Attack

Lead Instructor: AC Dave Fornell, Casstown FD Ohio, & Ret. Chief of Chicago FD, Andy O'Donnell

Course Description: You can see the glow in the sky. The engine stops in front of the building. There are decisions to be made: Attack. Rescue. Offense. Defense. This class will help give you the knowledge to make the right decisions, guide you toward successful outcomes, and keep you and your crew from being seriously injured or worse in the process.

Instructors with a combination over 150 years of on-line experience will walk you through the decision making process and then on the fire ground and hone your skills when making the attack. This is an advanced, intensive course- not for the faint of heart. You must have the determination to acquire the skills presented in order to succeed.

An intensive classroom session will present you with the basics, and the all-day burn session, staffed with seasoned professionals, will hone your skills in fire ground safety, team building, and send you home with knowledge of a proven and balanced approach to successfully sizing up, attacking and taking control of adverse situations. **Safety Rules Apply –Live Fire**

S-23 Coordinated Fire Attack @ Flashover Simulator, (New) ***

Lead Instructor: Aaron J. Heller is a 30 year veteran of the fire service and a captain in charge of training for the Hamilton Twp. NJ Fire District #9. Capt. Heller is a NJ Level 2 instructor, fire official, and EMT. Heller is an instructor with the Mercer County Fire Academy. Capt. Heller instructs at several national, regional, and local training events including FDIC, FDIC EAST, Firehouse Central, and dozens of FOOLS sponsored events. He is a founding member of the Jersey F.O.O.L.S chapter of the Fraternal Order Of Leatherhead Society, and the owner of On Scene Training Associates, LLC.

Course Description: This class will cover Engine and Truck Ops in the morning as you rotate through different stations including the Flashover Simulator. **“Flashover is one of the most-feared phenomena among firefighters. Firefighters will be taught to recognize rollovers and flashovers in this rotation that one day might make a difference.”** Then after forcing the door, throwing a ladder and venting, enter, isolate and search as well as some RIT and hose work. You will break you up into companies where you will put it all together. Your crew arrives on scene and receives orders to force the door, stretch the line to the fire; do VEIS, be assigned search, or be RIT. Instructors for this class are from Hamilton, New Jersey, Chicago Squad 1, Wheeling FD, Naperville FD, to name a few. Students will be taught and challenged by some of the very best in the Fire Service as well as peers- crawling down that smoky hallway in search of fire and victims. **Safety Rules Apply –Live Fire**

Saturday 8 hour Hands On Classes

S-1 Basic to Intermediate SCBA & MAYDAY Training

Lead Instructor: Jeff Van Patten & Jim Cook/Antioch IL FD

Course Description: This class is designed as a confidence builder for those individuals who have limited experience using Self Contained Breathing Apparatus. This class takes a hands-on approach with students working in mazes with blacked-out masks. The mission of this course is to return you to your department with a full understanding of their SCBA, its components, uses, limitations, emergency procedures, and the ability to survive in a hostile environment using your mind, body, and SCBA. Cadets/Explores are welcome in this class, **Safety Rules Apply & SCBA**

S-5 Basic Fire & Arson Investigation, with hands-on

Lead Instructor: Andrew M Skic, Mount Prospect FD

Course Description: With departments downsizing &/or pooling their resources, the task of fire and arson investigation is one resource not to be overlooked and could be standardized easily. Whether you have been in the fire service for 6 months or 20 years, consistent and recognized procedures are crucial to a thorough and complete investigation. Some legal aspects, hands-on evidence collection, effects of suppression, etc. will be covered. The student will leave with the ability to help establish standard policies and practices

S- 6 Eng Ops Class

Lead Instructor, Tom Reiter

Course Description: Info to come

7 Rural Water Operations

Lead Instructor: Mike Soderberg Asst Chief
Town of Turtle Fire Dept.

Course Description: "The goal of the Rural Water Supply class is to provide a review of water supply operations in non-hydranted areas so that all participants are able to improve their own performance when delivering water via tenders" **Safety Rules Apply**

S-8 Female Firefighting Operations

Lead Instructor: Cathy Wagner, Assistant Chief Rochester FD

Course Description: This class is geared toward female firefighters who are looking to learn a few tricks of the trade that will help them with firefighting operations and get the job done on the fire ground. These Instructors have all overcome obstacles to become successful in the fire service. They will pass along some tips and tricks that they have been taught in order to help you become more successful during fire ground operations. The class starts off with skill stations and wraps up at the end of the day with evolutions in an acquired house. If you're a female firefighter looking to take it to the next level, these female fire instructors are going to push you there. **Safety Rules Apply**

8- Hr Saturday Extrication Classes

S-4 Heavy Rescue Extrication

Lead Instructor: Chief Kirschhoffer of Newport FD

Course Description: Rescuers will work on with heavy rescue stabilization equipment, a large variety of power, hydraulic & hand tools in mitigating crash situations involving trucks, buses & heavy equipment. The Instructors will lead the class in a hand on operation. A heavy emphasis will be placed on large scale incident command, leading to a large scale, hands on multi vehicle incident. The class will be co-sponsored by Paratech Rescue Equipment & Ajax Tool. **Safety Rules Apply**

S-11 Vehicle Extraction-Crash Bash

Lead Instructor: William Puckett, TERC Judge

Course Description: This program is heavy hands-on car cutting. Students will learn techniques and procedures from instructors who specialize in extrication/disentanglement. Students will rotate through a series of evolutions which include stabilization (cars on their sides, on wheels, on roof) door popping, fifth door, Noah's Ark (or clamshell), dash push, dash lifts, & tunneling. **Safety Rules Apply**

Saturday 4 hour Morning Class Room classes

105- Trauma Review

Instructors: Steve Loudon, RN OSF Life Flight; Karen Daub-Larson, RN OSF Life Flight

OSF Life Flight Nurse will discuss the most current treatment recommendations for the pre-hospital trauma patient and how to apply care. Trauma care is a routine part in the life of an EMT. Understanding the nature of trauma, recognizing the mechanism of injury, and identifying potential life threatening injuries are all valuable tools that an EMT must have in their arsenal. This session sharpens those tools of the experienced EMT, or perhaps introduces a new way of looking at trauma for the experienced EMT. Case Reviews.

106-STEMI recognition with a 12 LEAD

Lead Instructor: Penny Lentz, PALS Coordinator-Swedish American Hospital

Course Description - This class will address identification of STEMI's using a 12 lead ECG. Review of lead family's and ST elevation requirements for determining an MI, help identify the location of the MI and the differences in the potential outcome of those locations. This class will review coronary artery circulation as well as the electrical system of the heart. This class will also identify STEMI mimics and give you tips to differentiate them.

Saturday 4 hour Afternoon Class Room classes

205 - Helicopter Landing Zone Safety, Appropriate Helicopter Utilization, Helpful Tips for the 911 Dispatcher when Calling for the EMS Helicopter

Instructors: Don Kilgore, OSF Life Flight Pilot; Karen Arndt, RN OSF Life Flight

Course Description: This OSF Life Flight track will offer a comprehensive overview of current topics relevant to Fire and EMS personnel. When and why should you call for a helicopter to transport your patient? We will review the nationally recognized guidelines of when helicopter transport is appropriate and how these apply to your agency. Is helicopter transport really safe? We will provide an overview of the most current EMS helicopter accident data and what is being done to make it safer. Our OSF Life Flight pilot will help you understand what is required for safe landing zone site selection, scene safety, and the do's and don'ts of working with EMS. This is a special lecture targeted to one of the most stressful roles, the 911 dispatcher; when having to coordinate a medical helicopter to the scene of an incident. We will provide a summary of what you need to know in order to efficiently and safely dispatch the helicopter to the scene.

206- Hot Topics in Para medicine

Lead Instructor: Penny Lentz, PALS Coordinator-Swedish American Hospital

Community Paramedic by Richard Robinson (EMS Program Coordinator) & Cathy Lewis (Application Analyst)

Medications by Kirk Schubert, (PharmD – SwedishAmerican Hospital)

Stroke Awareness by Teresa White (Nurse Educator for SwedishAmerican Hospital)
EMS in Haiti – Dr. John Underwood

Course Description: Community Paramedic – Where are we going?

Medications – “What’s in your med box” - What new medications may you be seeing on the ambulances!
Medication shortages!

Stroke – Awareness, Recognition, Management!

EMS in Haiti

Be advised the book is about 90% done, with that said it will be updated with class information for up to three more classes and class descriptions. There are also a few other events that we hope to add to the school this year. So please look forward to these additions.

Students, Instructors & Vendors,

The Students dinner is included in the cost of registration. Additional dinner tickets are \$10 each.

**The Dinner will be held from 4:30-6:30 pm on Saturday at
State Line Ice & Community Expo Center 1632 4th Avenue West**

Please come visit the Vendors & have share a meal with the instructors and fellow Brother and Sister Firefighters

2014 Classes & Registration

Circle the "X" in front of your first class choice, then 2nd, then 3rd, 4th, in case your first class or two are already full.

20-Hr Hands On Class for Thursday/Friday 8 am- 6pm

\$130.00 per class plus school fee

The SLICE from 4:30-6:30pm

State Line Ice & Community Expo Center

1632 4th Avenue West

Please come visit the Vendors and share a meal with your Instructors, and fellow Brother and Sister Firefighters

Registration Information- Please Read

Classes will be assigned on a first-come, first-serve basis. Placements will be assigned in the order that registrations are received. There will be no place-holding by telephone or without payment and proper registration forms completed. If classes are full, students will be assigned to their second-choice class. If all choice classes are full, the participant's fire chief will be contacted for a class selection. **Student's who wish to sign up for more than one class, please circle the "X" on the form for each class.**

The *Fire Education Registration Form* must be received no later than Thursday, July 26th, 2014, to assure placement for desired classes. **Class fees for hands on classes do include lunch. Lunch will be brought to the class site.** Fees for each class are indicated in the description section for the class. You will notice that there is a ONE time school fee \$70.00. **Please use care when calculating the fees your department owes for classes as miscalculated fees will impact a registrant's placement in the class.**

DO NOT SEND MONEY OR FORMS TO THE MONROE FIRE DEPARTMENT, SLICE OR TO BLACKHAWK TECHNICAL INSTITUTE. Money or forms sent to any of these will not be accepted.

Each participant must have Worker's Compensation coverage by his or her department or business. A Chief or training officer must complete and sign the *Fire Education Registration Form*. **THERE WILL BE ABSOLUTELY NO PARTICIPATION WITHOUT A PROPERLY COMPLETED FORM.** **PAYMENT MUST ACCOMPANY THE PRE-REGISTRATION FORM and Students must sign the Fire School Waiver showing that they have read it and understand it**** the form can be found at www.swnifra.com on the front page**

Please do NOT call the Monroe Fire Dept. for information. PLEASE CALL THE ASSOCIATION CELL PHONE AT 815/721-1855 FOR QUESTIONS OR CLARIFICATIONS. Class confirmations will be mailed to the address given and emailed if on the *Registration Form* until July 26th, 2014. After July 26th, 2014, call 815/721-1855 for confirmations. Full refunds will be given for cancellations received by July 19th. There will be NO refunds given after that date. **PAYMENT AND A SIGNATURE FROM A CHIEF OR TRAINING OFFICER MUST ACCOMPANY THIS PRE-REGISTRATION FORM.**

CHECK-IN & MISCELLANEOUS

Fire School participants MUST check in on each morning of their classes. **Check in will be from 6:30 a.m. to 7:20 a.m.** at the SLICE. Persons who are not pre-registered may register for any class with openings. However, **walk-in registrants must bring payment, a registration form signed by their chief or training officer, as well as proof of Worker's Compensation insurance.**

Classes start promptly at 8:00 a.m. with a lunch break around noon. **Classes resume or start at 1:00 p.m.** Once the class is completed and the training site has been cleaned, certificates will be issued at registration at the end of the school day. Bus transportation will be provided to classes that are held off site. **Buses will load at 7:15 and depart at 7:30** so we can get classes started on time.

Any evidence of alcohol or drug consumption during the classes or lunch breaks will be grounds for dismissal from the class. No refunds or certificates will be issued if a student is dismissed for any reason. Instructors will have full discretion in enforcing this policy.

PAYMENT AND A SIGNATURE FROM A CHIEF OR TRAINING OFFICER MUST ACCOMPANY THIS PRE-REGISTRATION FORM.

REGISTRATIONS & PAYMENTS SHOULD BE SENT TO: SWNIFRA, INC.

P.O. BOX 68

Orangeville, IL 61060

PLEASE MAKE CHECKS PAYABLE TO: SWNIFRA, INC.

Safety Rules

The following Safety Rules regarding personal protective equipment (PPE) will apply for classes at this year's Monroe Fire School. These classes are identified in the Class Information section. **NO EXCEPTIONS WILL BE MADE.** If "Safety Rules Apply" is indicated in the class description, students must bring the following equipment in order to participate:

1. **Helmet** (NFPA approved) **and proper eye protection**
2. **NOMEX™ protective hood**
3. **NOMEX™ PBI coat with liner & NOMEX™ PBI pants with liner** (NFPA approved)
4. **Firefighting boots** (NOTE: 3/4-length boots are not approved in lieu of pants)
5. **Gloves** (Cal OSHA or NFPA approved)
6. **Self-Contained Breathing Apparatus. Note:** One SCBA for each two students from the same department will be accepted provided they are in the same class. Air cascade systems will be available to refill tanks. Each tank must have an acceptable hydrostatic test date stamped on it. **Dates are to be within five years for steel tanks and three years for aluminum composite tanks.** All SCBAs must be positive pressure type and be NFPA approved.

Any training involving **Live Fire will comply with NFPA Standard #1403 LIVE FIRE TRAINING EVOLUTIONS.** Wherever an SCBA is required, **no facial hair will be allowed.** This includes any **facial hair other than mustaches.** Protective hoods over beards are not safety approved. Each class will have a Coordinator/Safety Officer assigned to it and present at all times. The Coordinator/Safety Officer will inspect all protective clothing and equipment and will have the final say as to whether or not a student will be allowed to participate. **The Coordinator/Safety Officer's can recommend dismissal of any student who, in their belief, is acting in an unsafe manner. They will have to express their concerns with the School Coordinator &/or President of SWNIFRA. The School Coordinator & President will have final say.**

ACCOMMODATIONS

Camping at the Green County Fair Grounds

Camp sites are available for camper, trailer, and tent units at the Green County Fairgrounds. The cost will be determined by the Fair Board. The Fairgrounds will be open for camping on Thursday, Friday, and Saturday nights. The camping fee is for, and will be collected by, the Green County Fair Association, who owns the grounds. Bring your own tables and chairs. The Monroe Fire Department and surrounding fire departments are fully responsible for cleaning the grounds and buildings after the fire school, so your cooperation in using the garbage receptacles provided on the grounds is appreciated.

Possession and discharge of fireworks is prohibited under local and State of Wisconsin law. Campfires and open burning are prohibited by local ordinance. Only approved enclosed.
